

**Before and After Hurricane Gustav Images—Southeast, Louisiana
(Phased Array Type L-band Synthetic Aperture Radar (PALSAR) Satellite Imagery)**

April 6, 2008, PALSAR Image

September 3, 2008, PALSAR Image

The September 3, 2008 PALSAR image records flooding from Hurricane Gustav. Remnant surge flooding, occurring two days after landfall, is depicted as dark patches occurring in fresh through saline marsh areas south of New Orleans.
